*Allowable Subject Matter*

1. Claims 1 – 10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 9, and 10 are directed to an apparatus, method, and program code for outputting a page image corresponding to print data inputted from an external source with sophisticated sorting means. These claims have the uniquely distinct features of discriminating whether the sorter can be used or not and whether the maximum number of sorting page images that can be processed at once and using these discriminations to execute plural copy prints with or without using the image spooling means and page image reading means. The closest prior art Kato (US 5864732) and Okumura et al. (US 5465947) teach plural sorting modes and switching modes based on discriminations, but do not singularly or in combination teach the specific discriminations and resulting mode switching including spooling and reading means being used as claimed. Further reasons given in Applicant's remarks in Amendment dated 1/7/05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
